H2GO

Say goodbye to disposable plastic bottles and hello to sustainability with the convenient and eco-friendly reusable water pick up station — your solution for reducing waste and making a positive impact on the environment.

Emma Swarney, Tianze Li, Yi Lu, Yu-jui Tsao, Ka Ying Wong

H2GO introduces a hygienic pre-filled reusable water bottle borrowing scheme that is circular, efficient, and at a competitive price to the user. The user can use and tap their Octopus card, retrieve a reusable bottle, drink, and stay hydrated. Later the bottle is returned to the reusable bottle station at any grab & go station at the MTR. The Reusable bottle is sterilised at a cleaning facility, after that the sterilised bottle is filled again with water and loaded at a MTR station. Our strategy introduces an innovative hygienic solution, which is highly accessible to all passengers and motivates users to reduce unnecessary plastic waste.
